

FREE Streetlights, Installation and Maintenance with MHT's Energy Management Program

Free Energy Efficient Street Lights
Free Installation
Free Maintenance for 10 Years

NO out of pocket costs for lights!

Immediate Energy Savings!

Street lights are the largest percentage of a municipality's energy budget and are very costly to maintain. With energy prices on the rise, MHT is committed to offer solutions to reduce energy-related operating costs.

Equally important in today's capital-constrained environment, we have designed programs to achieve these savings and efficiencies without using municipalities' own or borrowed capital.

MHT is poised to meet market demand for energy efficient and smart grid solutions by offering advanced Induction lighting products, controls and services that will achieve up to an 80% reduction in consumption of lighting energy.

Benefits of Program:

- **Immediate** reduction of energy bill
- **Zero** up-front costs
- **Eliminates** Maintenance Expenses
- **Save** Energy and the Environment

MHT Lighting's 55,000 sq. ft. state-of-the-art manufacturing facility is located in Staten Island, NY. with additional sales and distribution in San Diego, CA. Our assembly lines are capable of manufacturing 8,000 - 25,000 fixtures per week and employs 16 American workers per line.

We are currently the only Induction Lighting company in the USA to be ISO 9000/01 certified for manufacturing and quality procedures. Every product has detailed step-by-step manufacturing, assembling and testing processes to ensure the highest quality and long life.

MHT Lighting meets "Buy American" requirements for ARRA funding.

WE HAVE

\$400 MILLION DOLLARS

BUDGETED FOR YOUR NEW ENERGY
EFFICIENT STREETLIGHTS

Saving Municipalities' Energy and Budgets!

MUNICIPALITIES CAN INCREASE SAVINGS WHILE DECREASING EXPENSES!

Benefits of MHT's Induction Lights:

- Fastest ROI of any commercial lighting technology
- Up to 70% more energy efficient and lasts 3-4 times longer than high pressure sodium
- Best quality "white light"
- Rated lifespan – up to 100,000 hours and over 70% at 60,000 hours
- Most proven Energy Efficient lighting technology on the market. Proven over 12 years in the field
- Available in 3000k -5000K Color temps
- Tested, Inspected and Burned-in for Quality Assurance
- 10 Year warranty

Frequently Asked Questions

Q How does this save our municipality money?

A There is no upfront cost for the lights, a split in energy savings the very 1st year, plus additional saving on installation and maintenance labor for 10 years.

Q What are the requirements for the programs?

A In order for us to calculate savings and the custom program, we require information such as existing street light technology, cost per KW/h or tariff rate, quantity of lights, application, wattage, hours of operation and labor cost. Project parameters are from \$1-50+ million dollars.

Q Who owns the lights?

A The street lights will be owned, installed, serviced and maintained for a calculated number of years and then turned over to the municipality free and clear.

Q What are the benefits of using MHT's program over financing the lights?

A Financing is not only hard to obtain these days, but still requires the municipalities to budget funds for maintenance and incur costs associated with maintaining the streetlight department. Both will be eliminated with this program.

Q How are the streetlights paid for?

A The streetlights are paid for by the savings. The city may save an average of 50% on the utility bill, with a portion being used to pay for the program and the rest going back to the city.
